UX Designer and Developer

# Hello!

I'm a UX Designer and Developer with 5+ Years of Experience specialise in Building Exceptional User Experiences for E-Commerce, Healthcare, AdTech and more.

# I Transform Complex Ideas into User-Friendly Designs

With a Bachelor's degree in Computer Science, I have a strong base in software engineering. I have built upon this foundation by specializing in UX design and have a deep understanding of various web technologies and design tools.

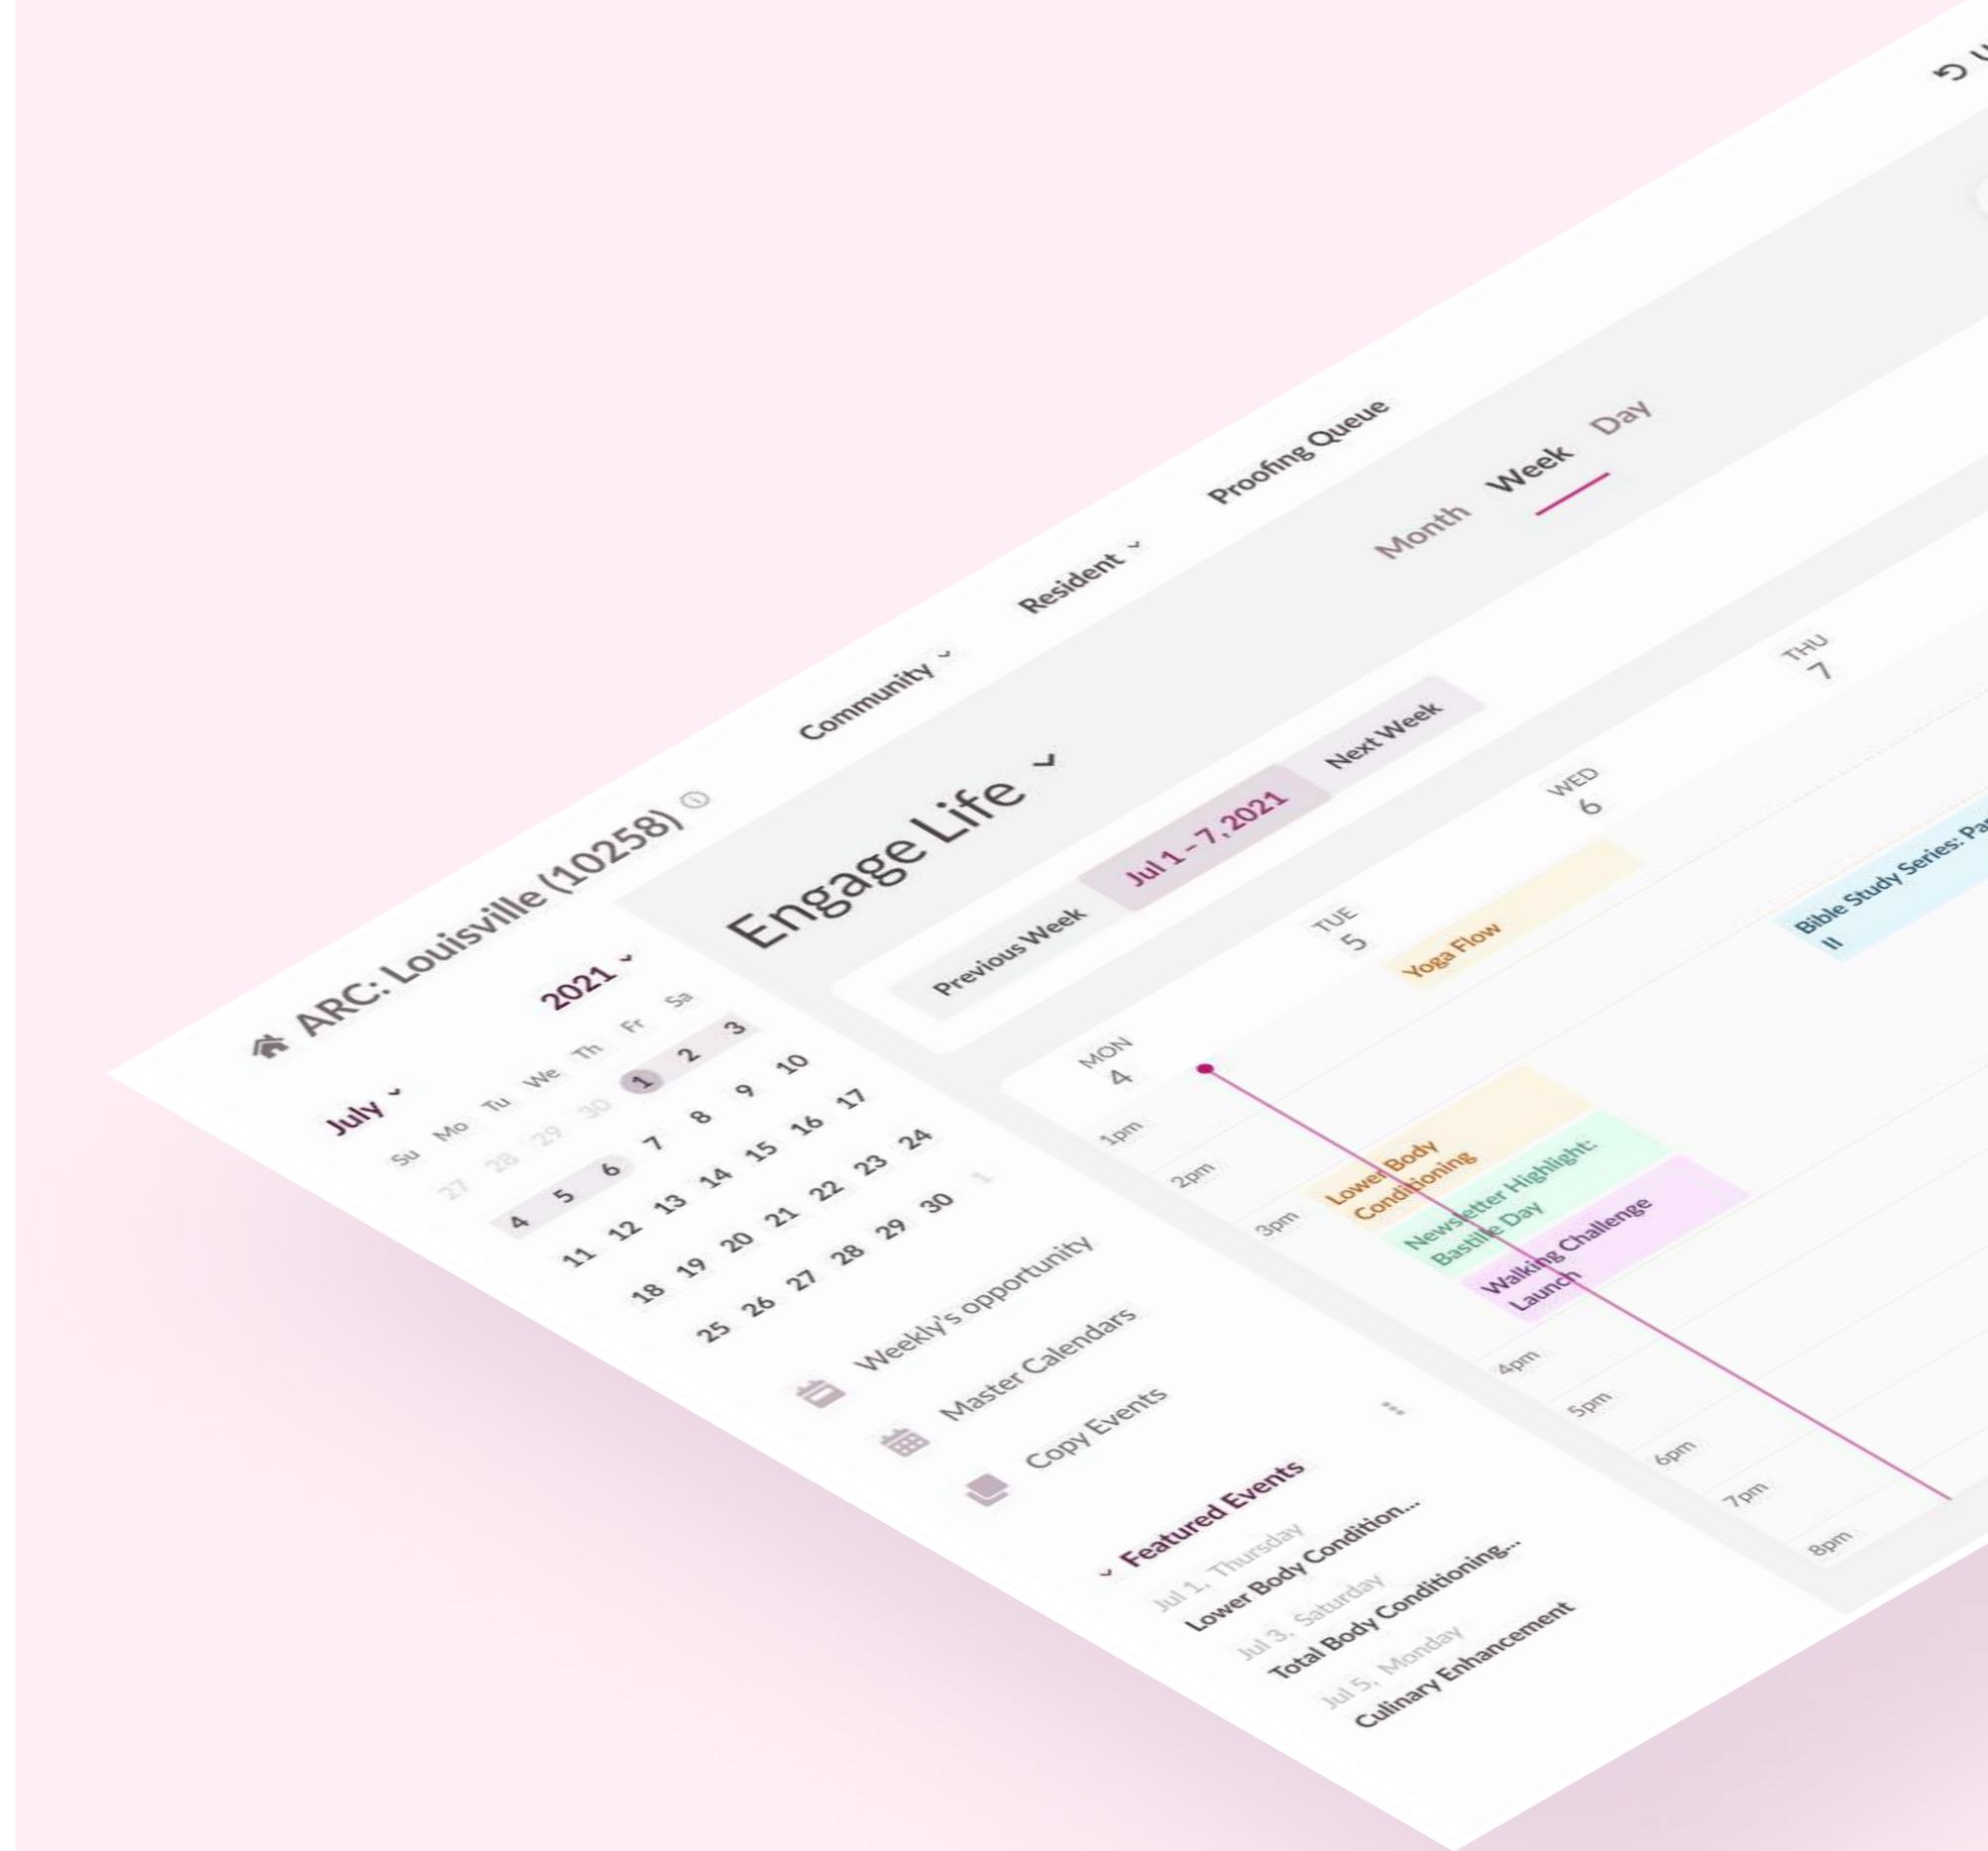

# 30+ Successful Projects

- 3 year  
Designing Logistics, OTT, AdTech and Healthcare solutions;
- 2 years  
Creating solutions on Magento and Prestashop platforms;
- 1 years  
Development and support of websites and complex web systems;
- Additional Experience  
Freelance, Designing UX Artifacts, Brand Identity, etc;

# Event Planning and Scheduling in Senior Living Tool

System Module • Design System • Research

## WORK 1 / 5

Event management software, such as Atria EMT, can improve the lives of seniors by providing a platform to create and submit events for review, allowing for the efficient management of event calendars. This helps residents stay engaged and active in their communities.

## Application functionality

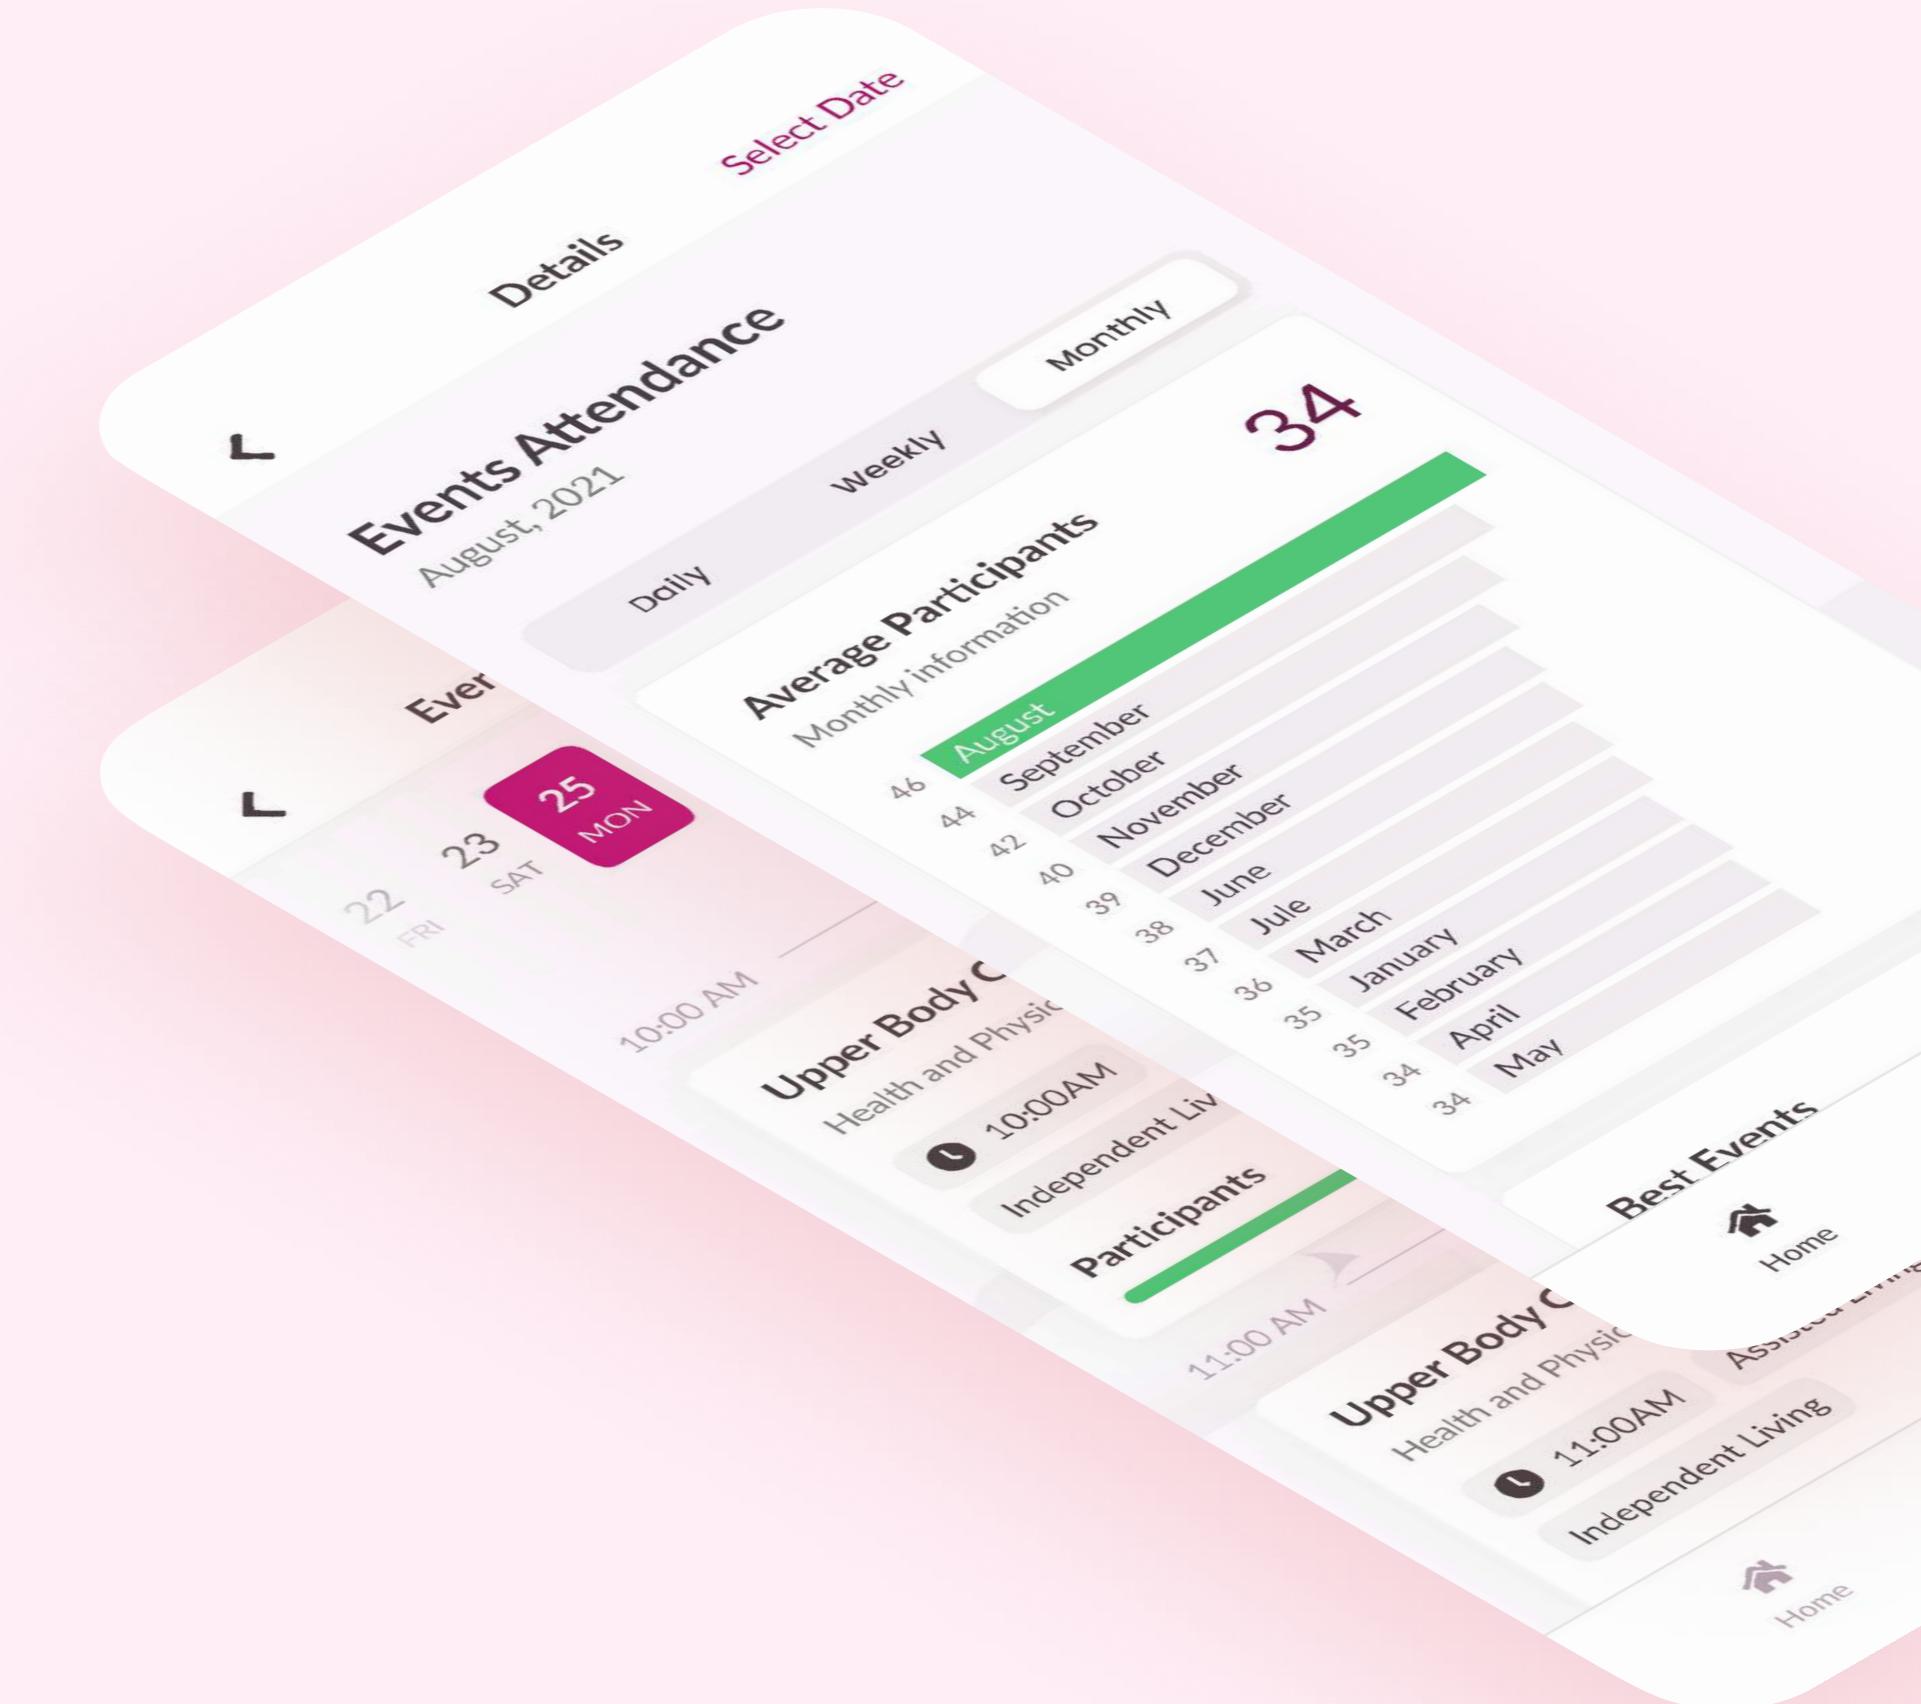

- Working with events;
- Duplicate events;
- Master Calendar feature;
- Roll forward;
- Existing features improvements;

The image displays a collage of screenshots from the Atria EMT software interface, illustrating its various features:

- Top Left:** A calendar view for July 2021, showing specific events like "Lower Body Conditioning" on Thursday, July 1, and "Total Body Conditioning" on Saturday, July 3.
- Top Center:** A "Community Events" section showing a "Report Name" field and a "Create Report" button.
- Top Right:** A "Resident" section showing a "Report Name" field and a "Create Report" button.
- Middle Left:** A "Survey" section showing a "Report Name" field and a "Create Report" button.
- Middle Center:** A "Participation by Event Report" screen for "ARC: Louisville (10258)". It shows a calendar for July 2021, a location details section for "Louisville (10258)", and a table of participation data. The table includes columns for ID, Date, Time, Dimension, Event, and Location. One row is highlighted with a green background.
- Middle Right:** A "Proofing Queue" section showing a table of items to be reviewed, with columns for Report Name, Create Report, and Status.
- Bottom Left:** A "Participation" section showing a table of participation data, with columns for Report Name, Create Report, and Status.
- Bottom Center:** A "Community Report" section showing a table of community report data, with columns for Report Name, Create Report, and Status.
- Bottom Right:** A "Community Report" section showing a table of community report data, with columns for Report Name, Create Report, and Status.

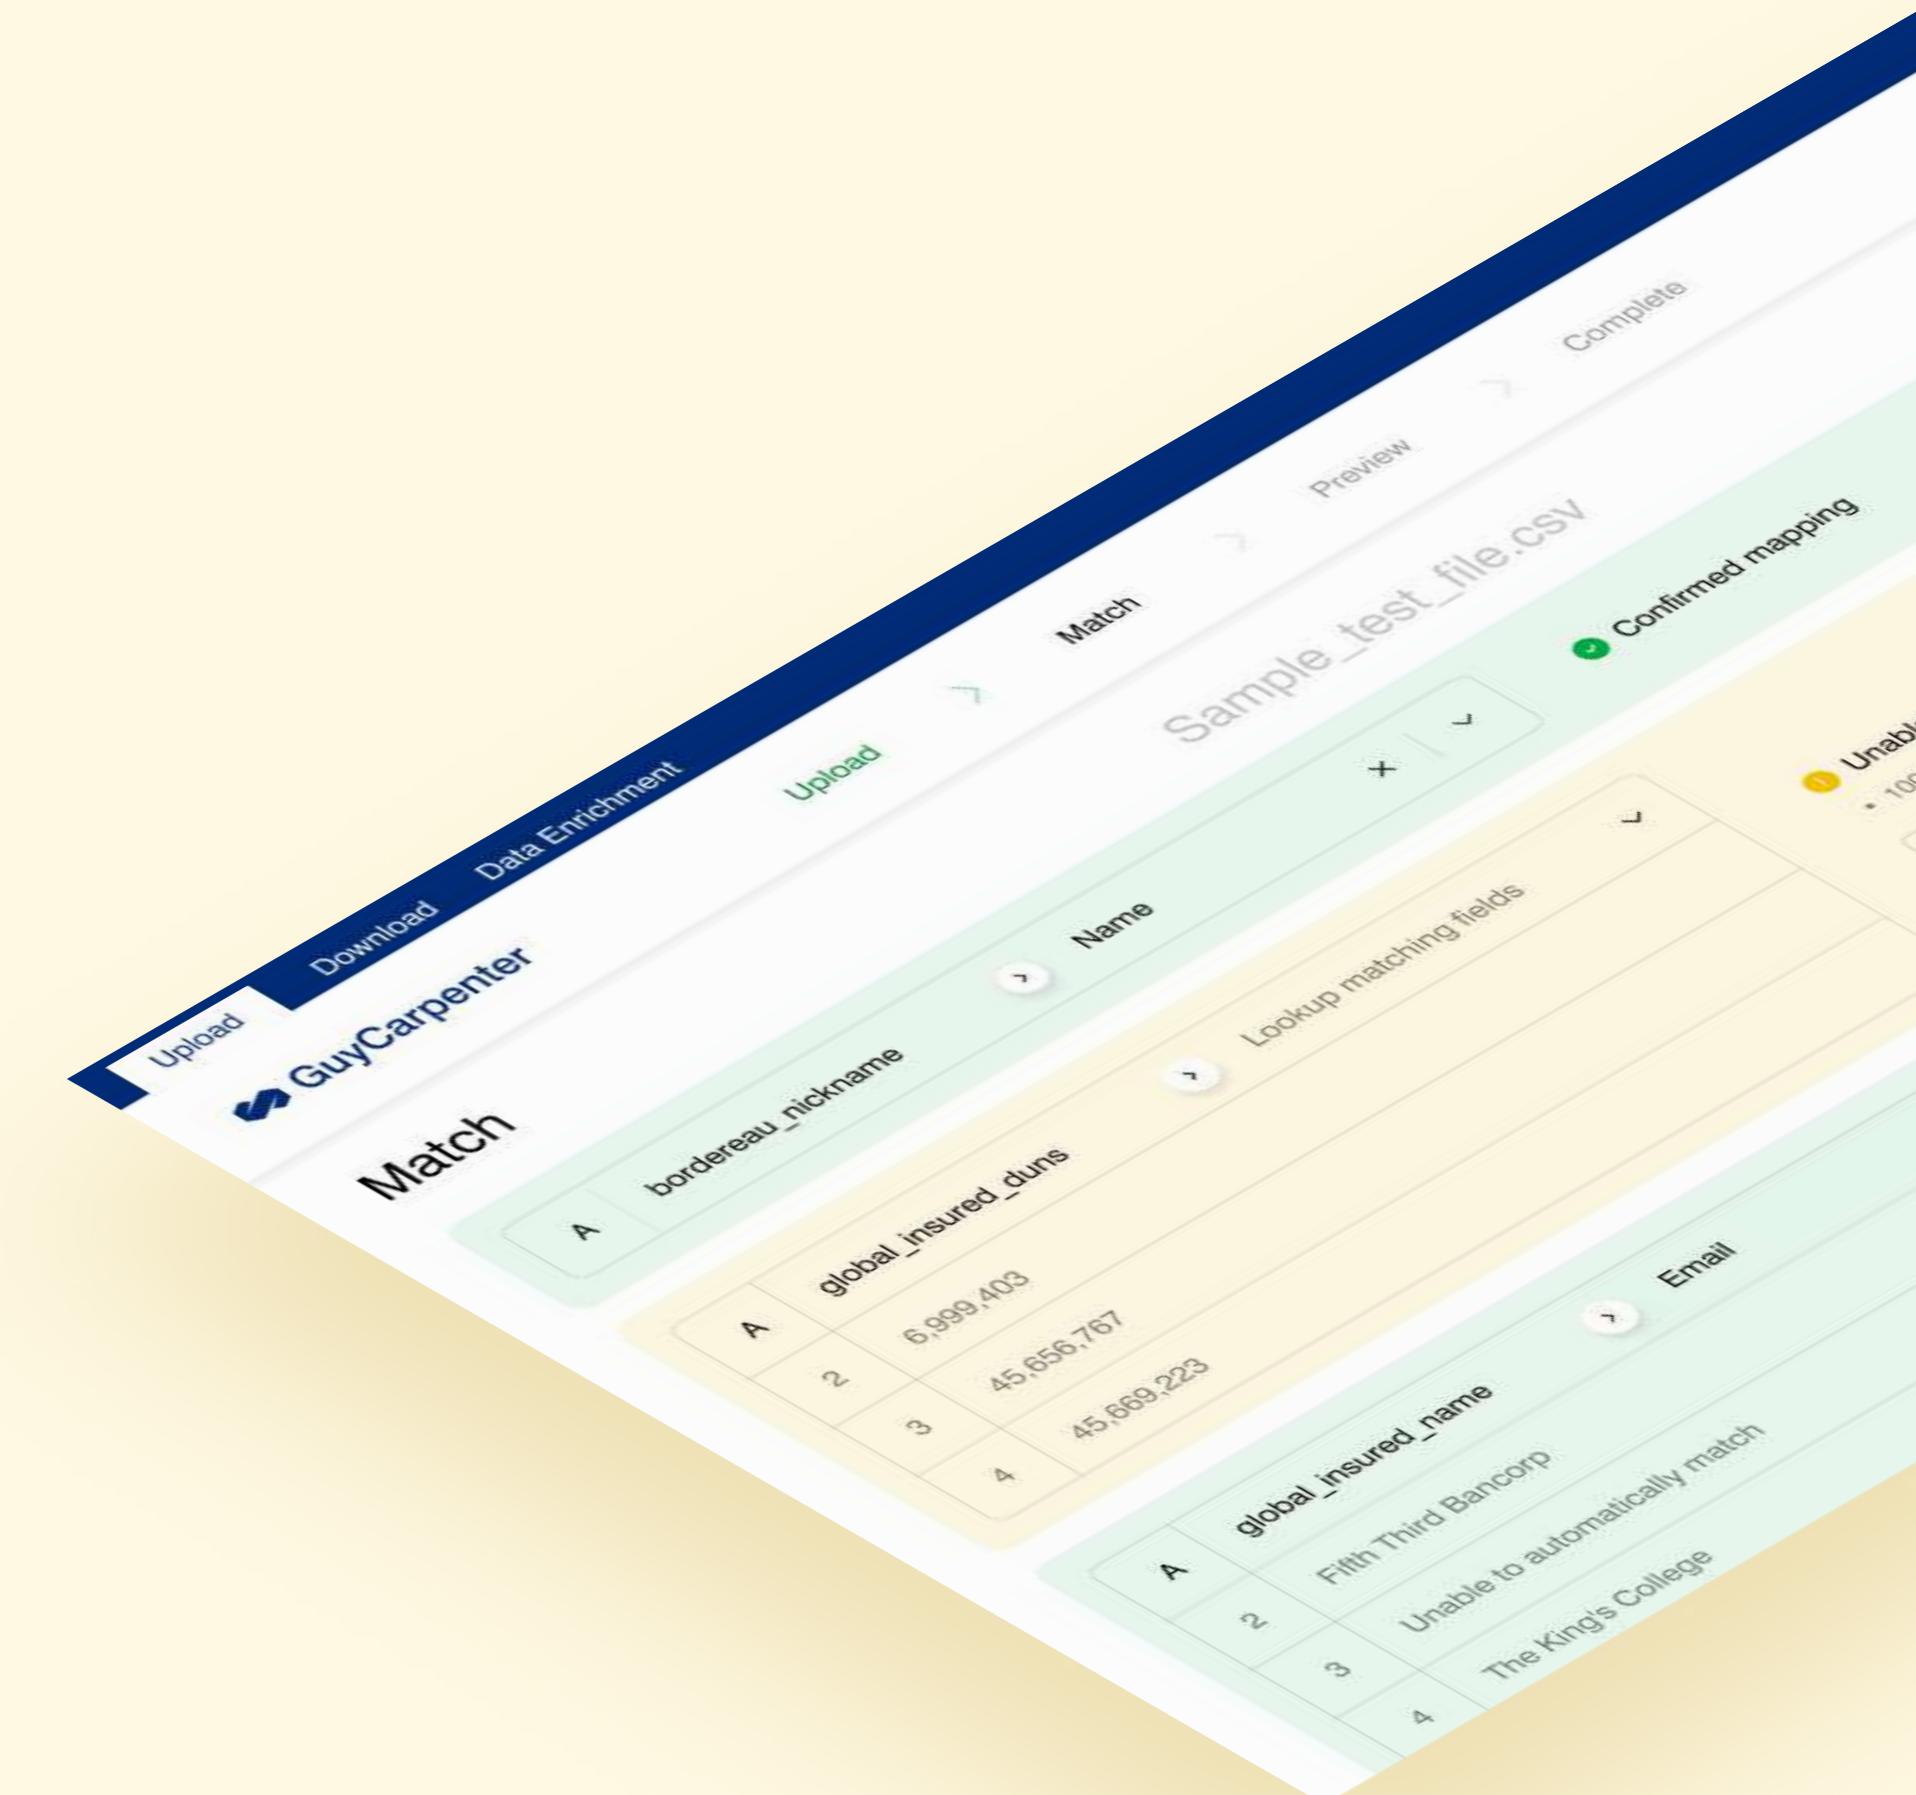

# A Mobile App to save event participants and analyze attendance statistics

# Guy Carpenter Reinsurance Tax Calculator

Enterprise • Design System • Research

Guy Carpenter develops advanced risk, reinsurance and capital strategies that help clients grow profitably and pursue emerging opportunities. This software is an internal tool for company employees.

## Application functionality

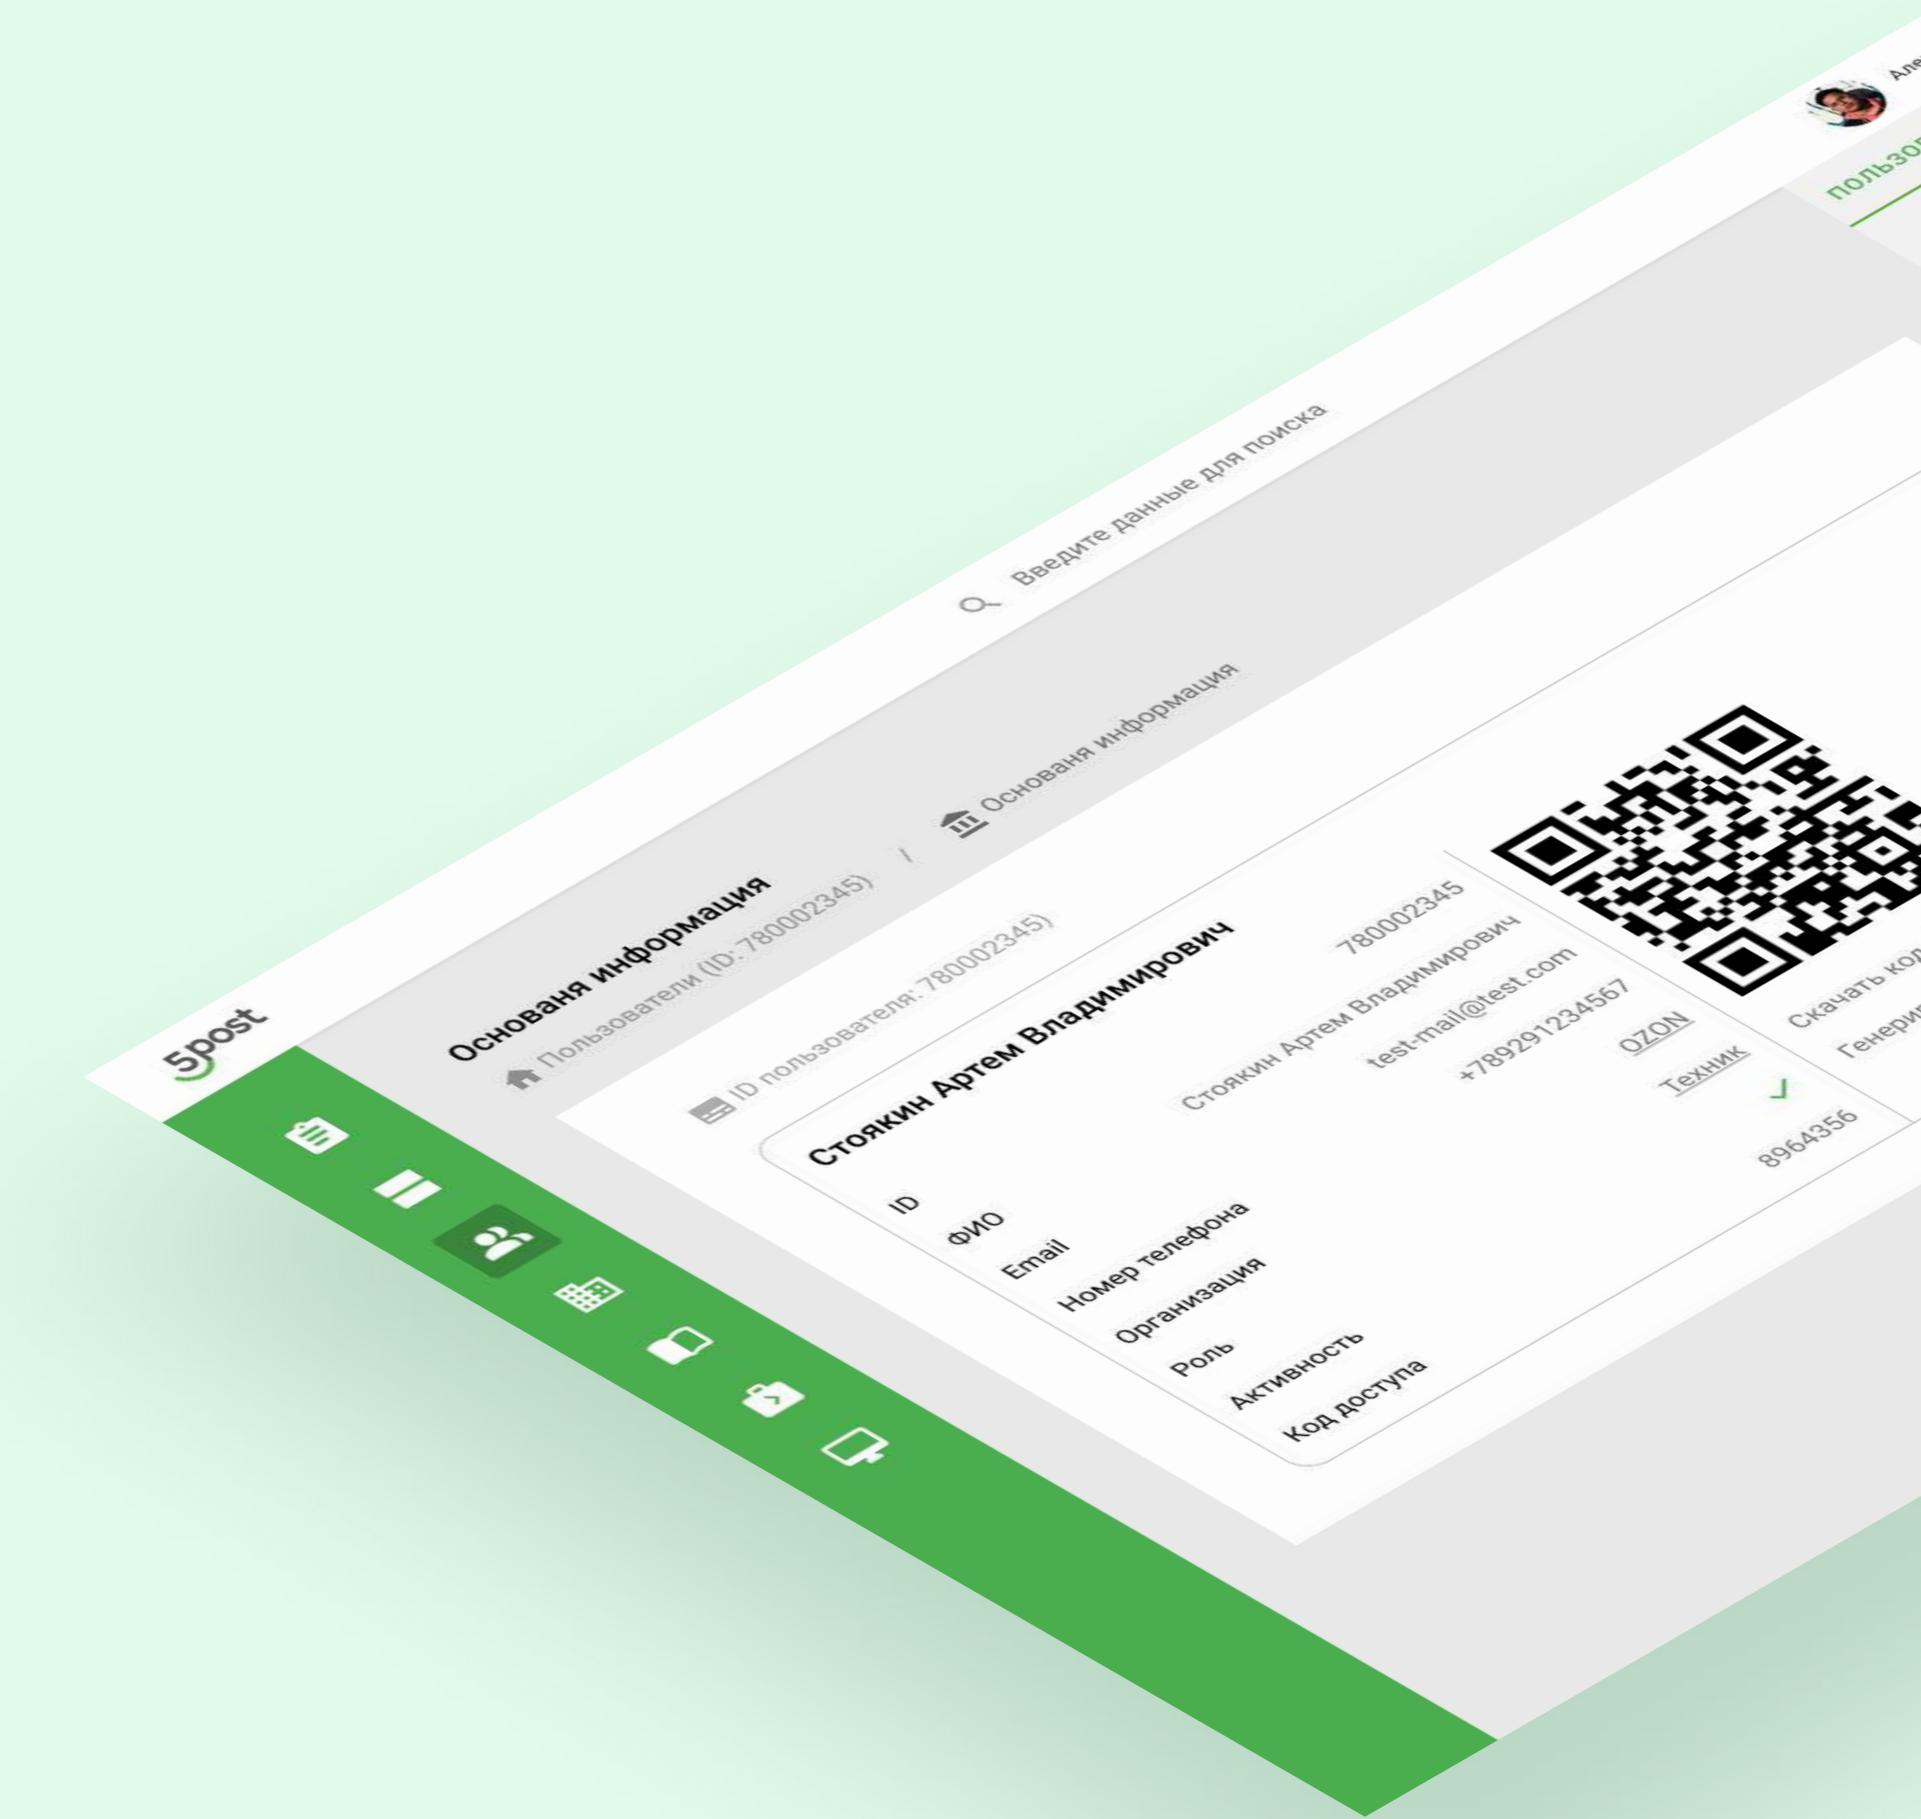

- Data tables matching;
- Mistakes audit;
- File version control;
- Data enhancement;

The image displays five overlapping screenshots of the Guy Carpenter software interface:

- Top Left:** A "Download" screen showing a list of files for selection. Options include "summer\_2021.csv", "autumn\_2021.csv", "cocontract21.xls", "engra\_prod.csv", "mettar.xls", "new\_rep.xls", "hs\_fn21.csv", "new\_rep.xls", "hs\_fn21.csv", and "hs\_fn21.csv". There are checkboxes next to each file name.
- Top Right:** A "Data Enrichment" screen showing a table of "Treaty Name" and "File Name" pairs. Examples include "6999403" and "summer\_2021.csv", "6999403" and "autumn\_2021.csv", etc. There are checkboxes and dropdown menus for "Original data", "UFC format", "Arium inputs", "ForCas inputs", "CyberCube inputs", and "Limit & Attach".
- Middle Left:** A "Match" screen showing two data tables being compared. The first table has columns "Name" and "Email". The second table has columns "global\_insured\_duns" and "Email". Rows are numbered 1, 2, 3, 4. A tooltip for the "Email" column in the second table says: "Unable to automatically match - 100% of your rows have a value for this column. Ignore this column".
- Middle Right:** A "Viewer" screen showing a table with columns "Cedent names", "Cedent names", "Treaty names", and "From:". It includes filters for "UKCom", "Retail", "Betting", and "FCinc". A tooltip for the "Treaty names" column says: "Matched to the Email field. - 100% of your rows have a value for this column. All values pass validation for this field. Ignore this column".
- Bottom Right:** A "Browse file" screen showing a table of business data. Columns include "Type", "Rate Change", "Exposure", "Claims Listing", and "Rate Change". Rows are numbered 1, 2, 3, 4, 5, 6, 7, 8, 9, 10. A tooltip for the "Rate Change" column says: "100% of your rows have a value for this column. All values pass validation for this field. Ignore this column".

# Postamat Control System for managing checkpoint cells and orders

CRM • System Redesign • Research

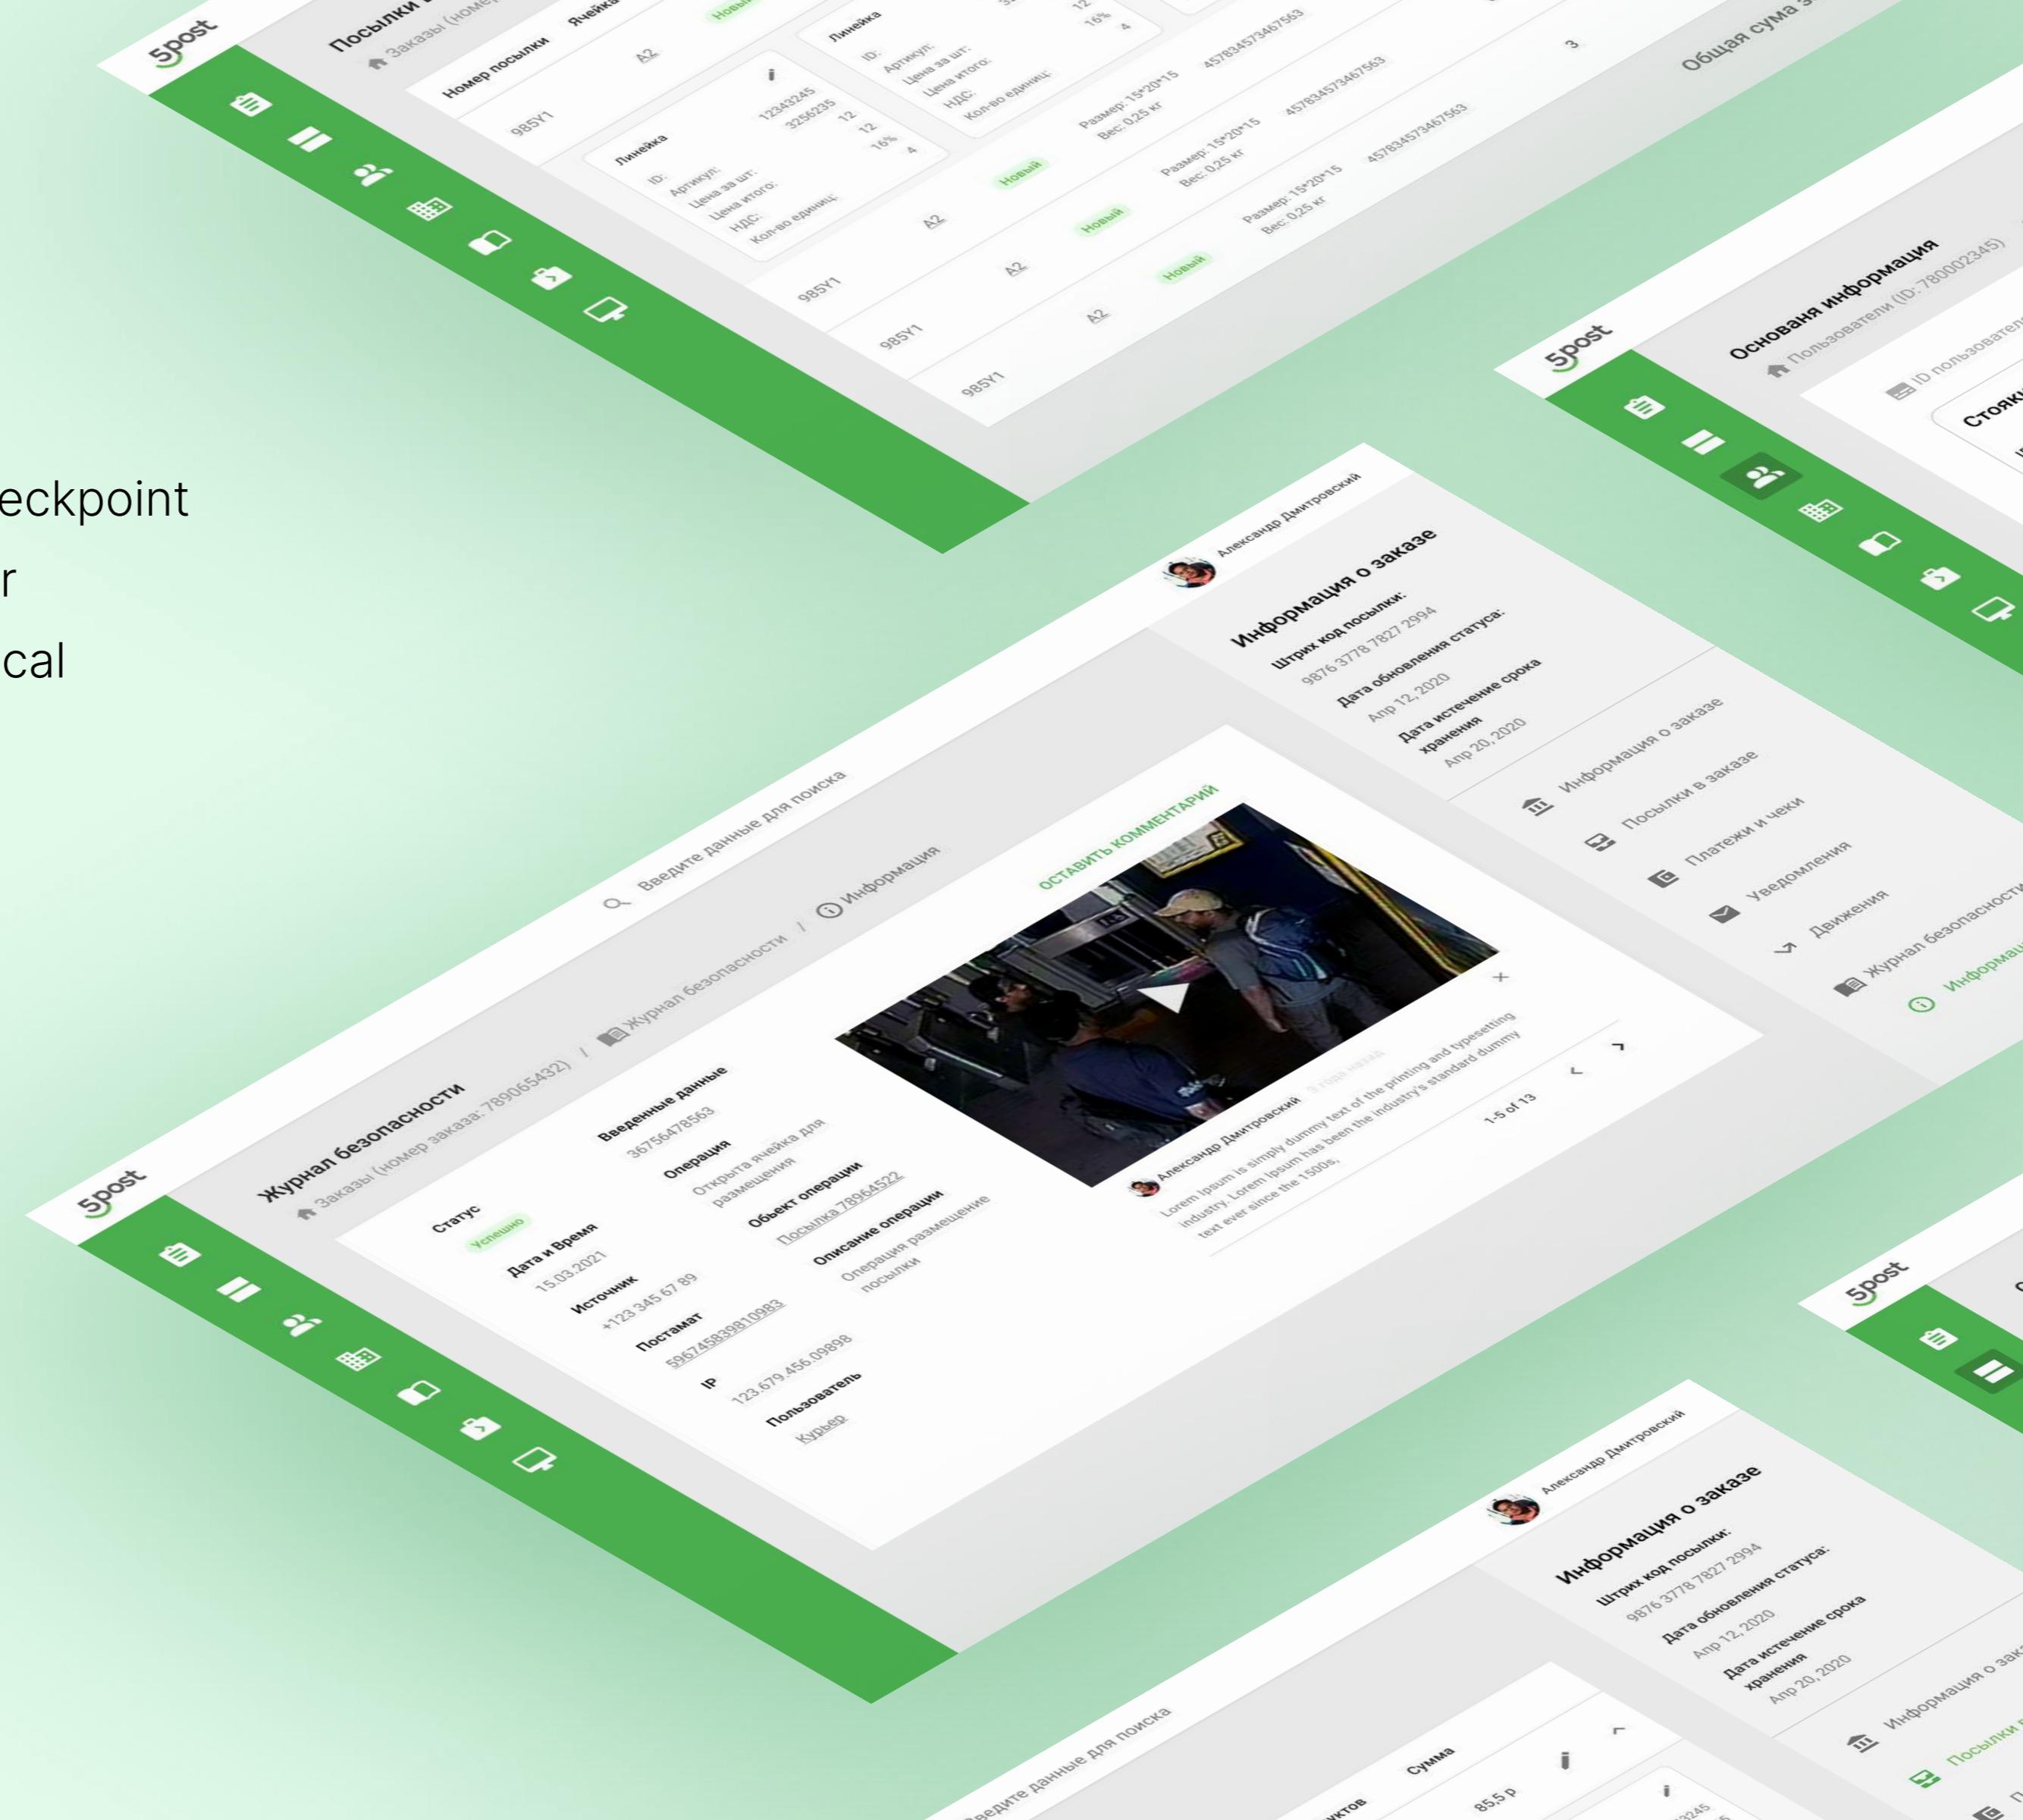

WORK 3 / 5

Admin panel for managing and monitoring checkpoint cells and orders. Includes various modules for managing and monitoring devices, the technical conditions, database, etc.

## Application functionality

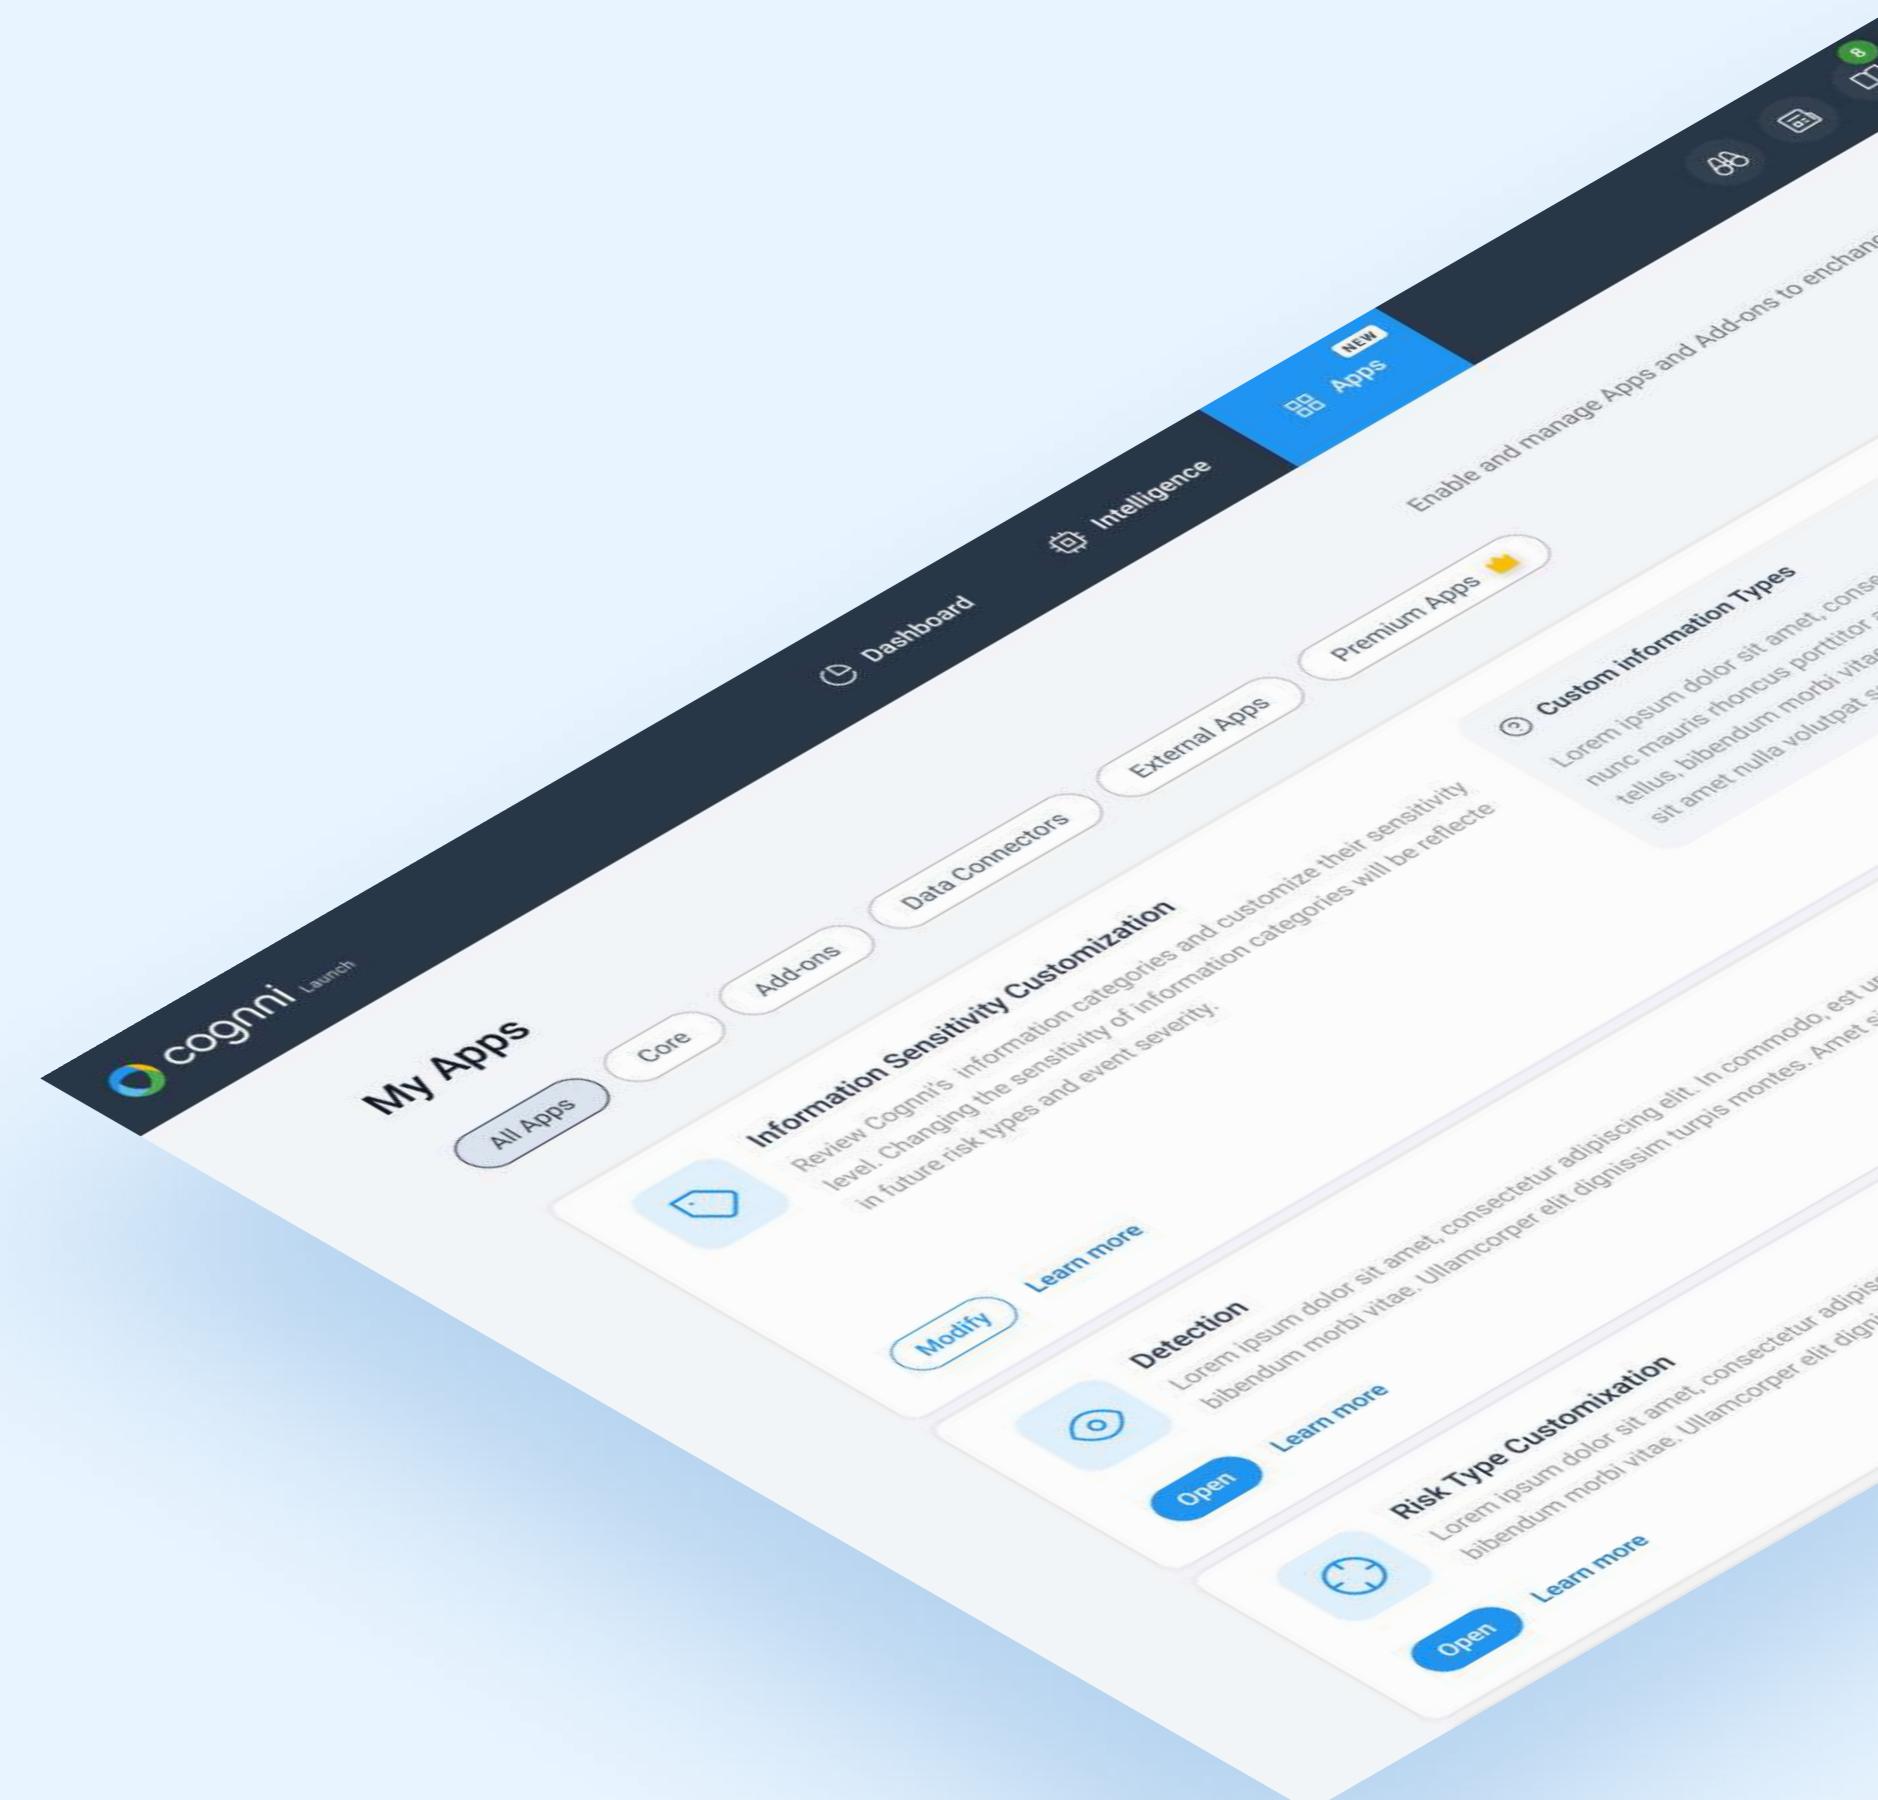

- Devices Control;
- Parcel Control;
- Database management;
- Transactions and expenses control;
- Invoice generating and tracking;

10 / 16

# Cognni.ai helps understand what kind of information files contain

SaaS • Design System • Research

Cognni offers a AI-powered solution for the information security field, providing organizations human-like understanding of their most critical information assets. It helps minimizing insider risks, configuring information security, and mitigating ransomware damages.

## Application functionality

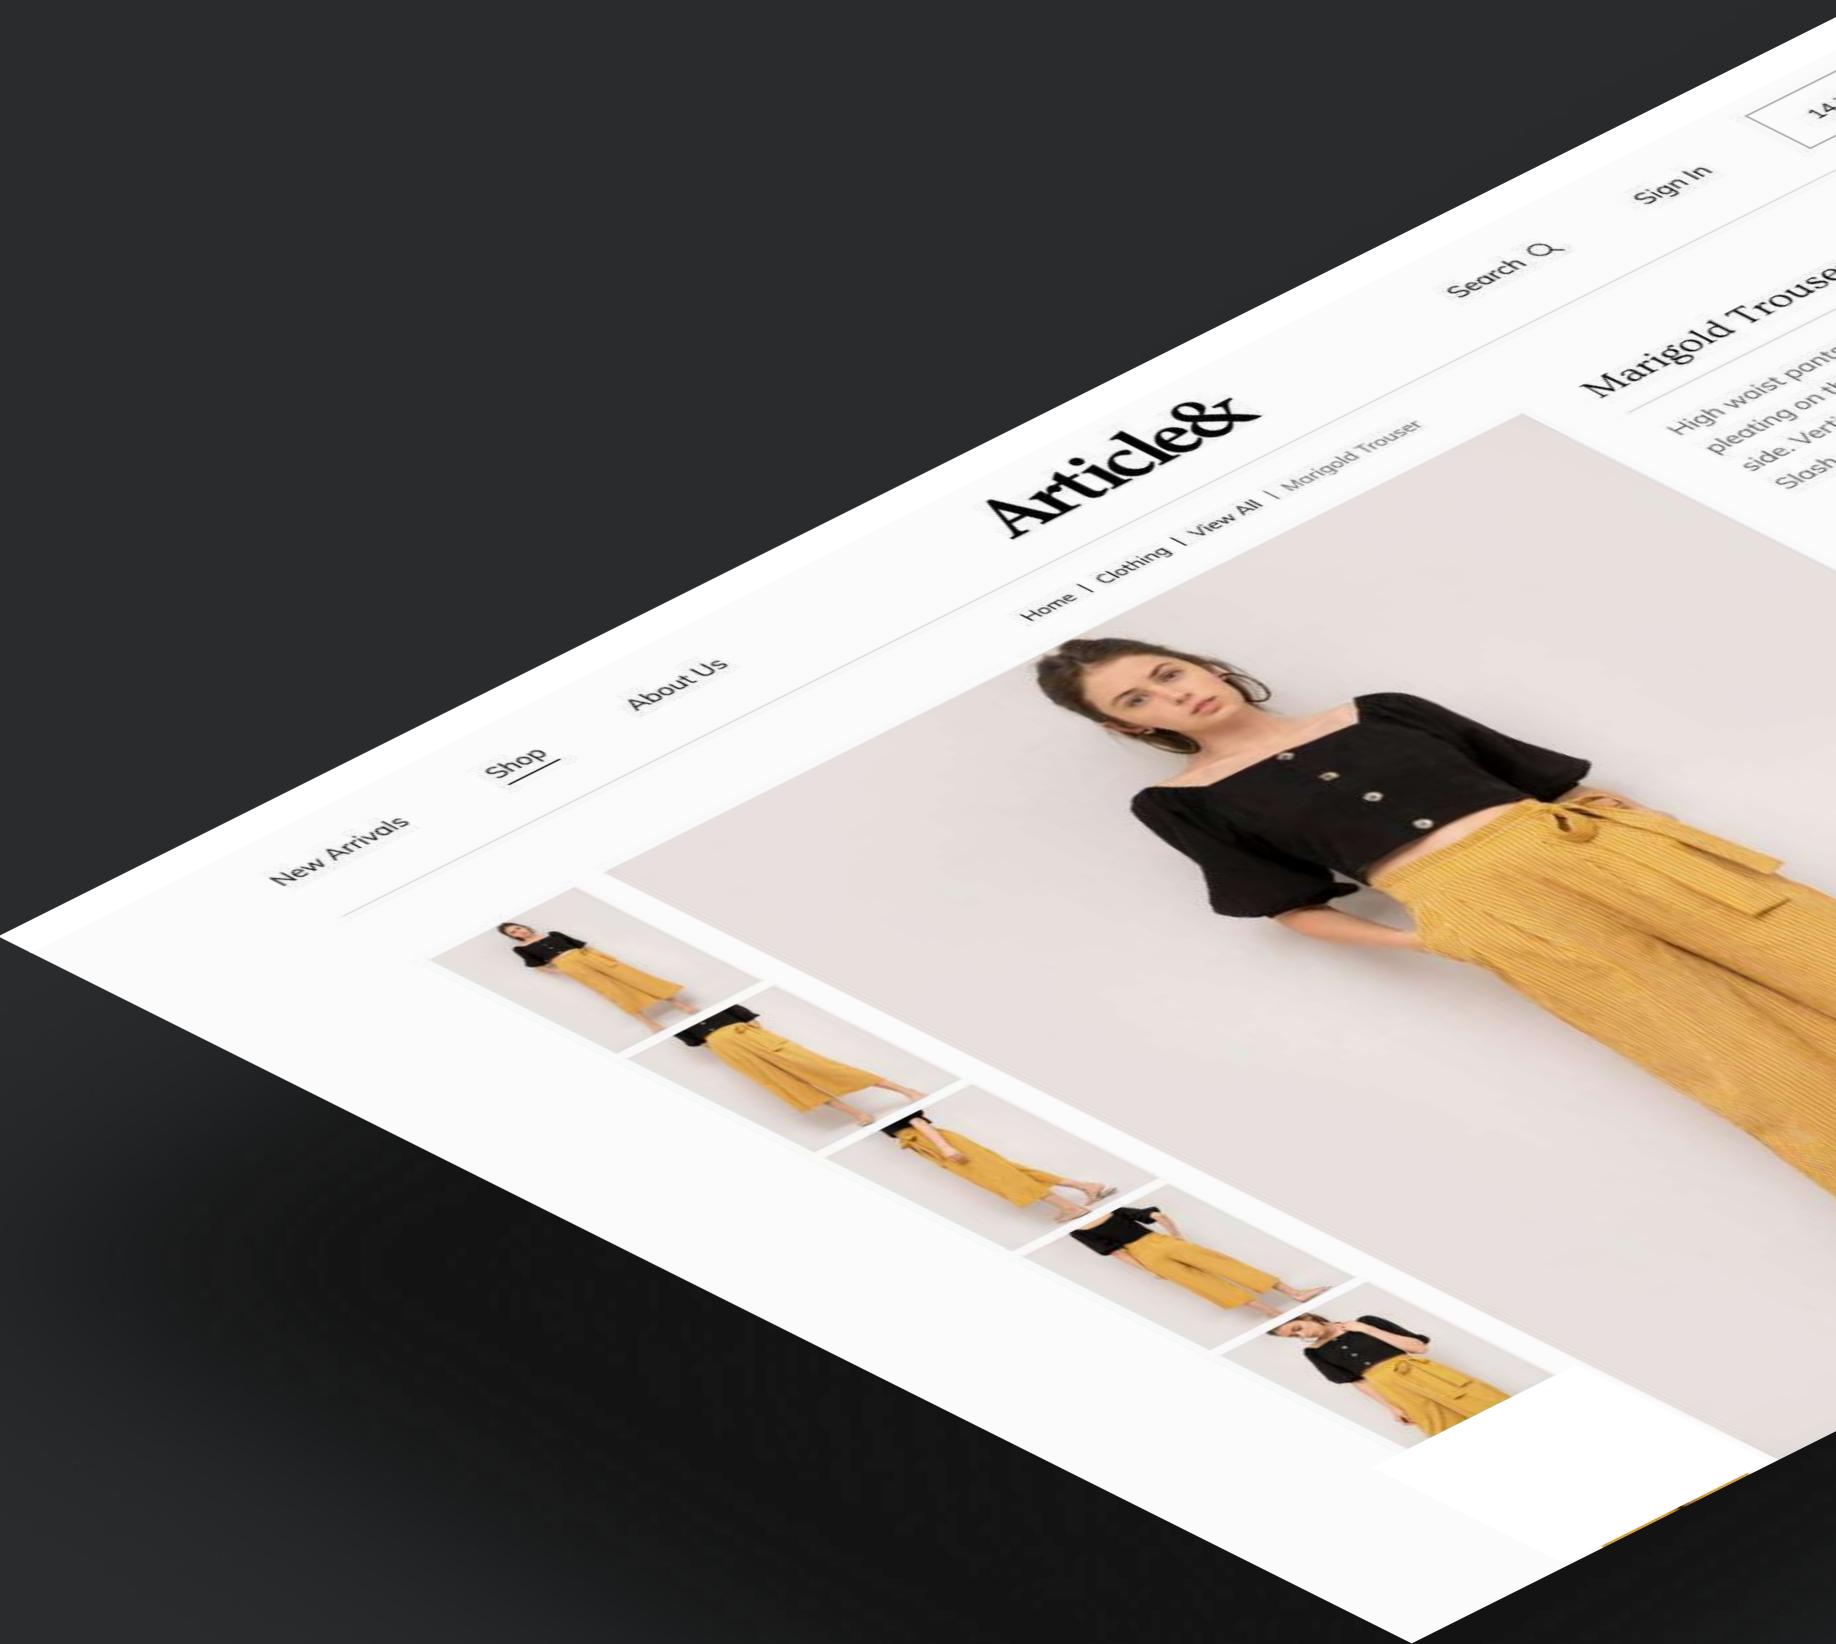

- File management;
- Vulnerabilities assessment;
- Other platform integration;
- Documents access control;
- Expandable platform;

The collage consists of five screenshots from the Cognni application:

- Accounts:** A list of accounts with columns for Name, Email, and various status indicators (AS, AF, BR, HS, JS, LV, RK, RI, SB). The list includes Amy Gomez, Andrew Fisher, Brian Ross, Heidi Smith, Johan Smit, Lucy Young, Rachel King, Richard Wilson, Sarah Brooks, and others.
- Dashboard:** Shows last week's activities and a summary of critical information exposure. It includes sections for Cloud Folders, Employees, Organizations, and External Access.
- Where Critical Information is being exposed?**: A detailed report on critical information exposure across different categories. For example, under "Cloud Folders", it shows 200 contain Critical Financial, 300 contain Critical Legal, 100 contain Critical HR, 100 contain Critical Governance, 0 contain Critical Business, and 0 contain Other Critical.
- Used Data Sources:** A chart showing the percentage of shared critical information per data source. The data shows SharePoint at 50%, Exchange at 20%, Teams at 10%, OneDrive at 20%, and others at 10%.
- Important investigations:** A section showing analysis between Feb 1, 2020 - Nov 15, 2020. It includes tabs for PRIVATE, PRIVATE, SHARED, and PRIVATE.

# Article&.com a New York based fashion online store selling apparel

Ecommerce • UI Kit • Magento • Responsive

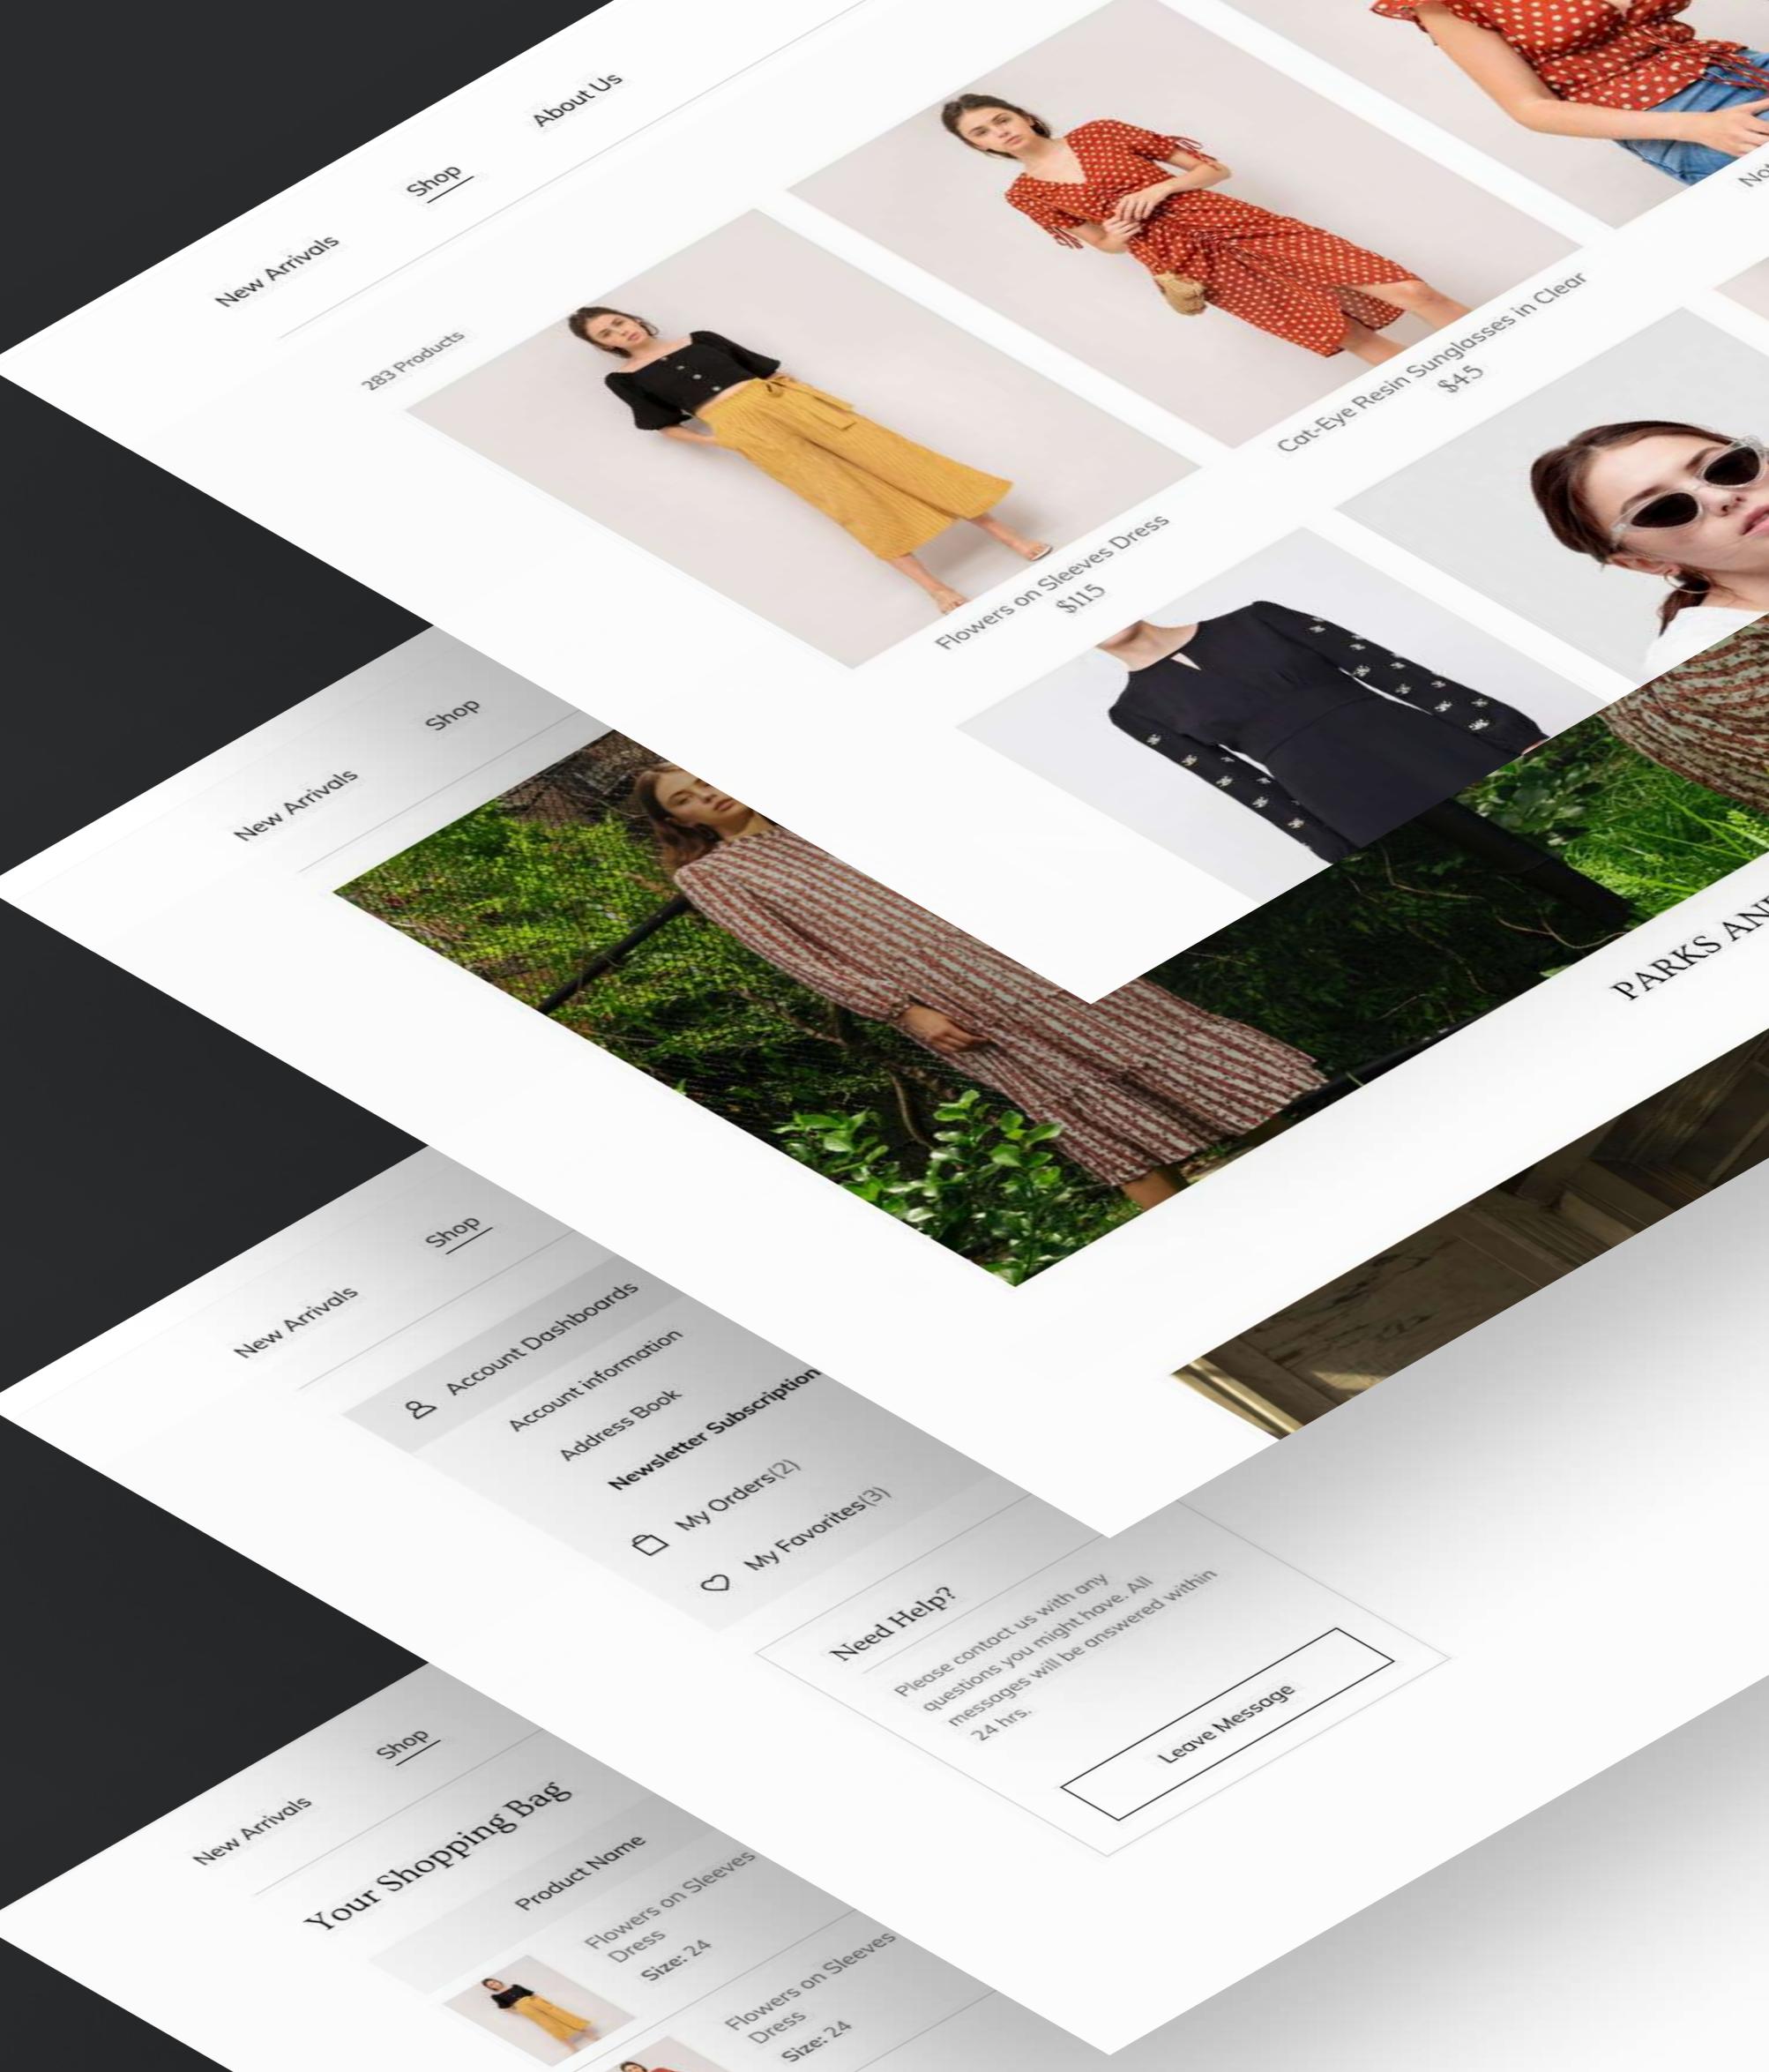

## WORK 5 / 5

The updating of the e-commerce website turned to redesign of the website, implementation of it and Frontend development with corresponding Backend support. Besides the desktop version of the store we took special care of the mobile one keeping it neat, stylish and clean.

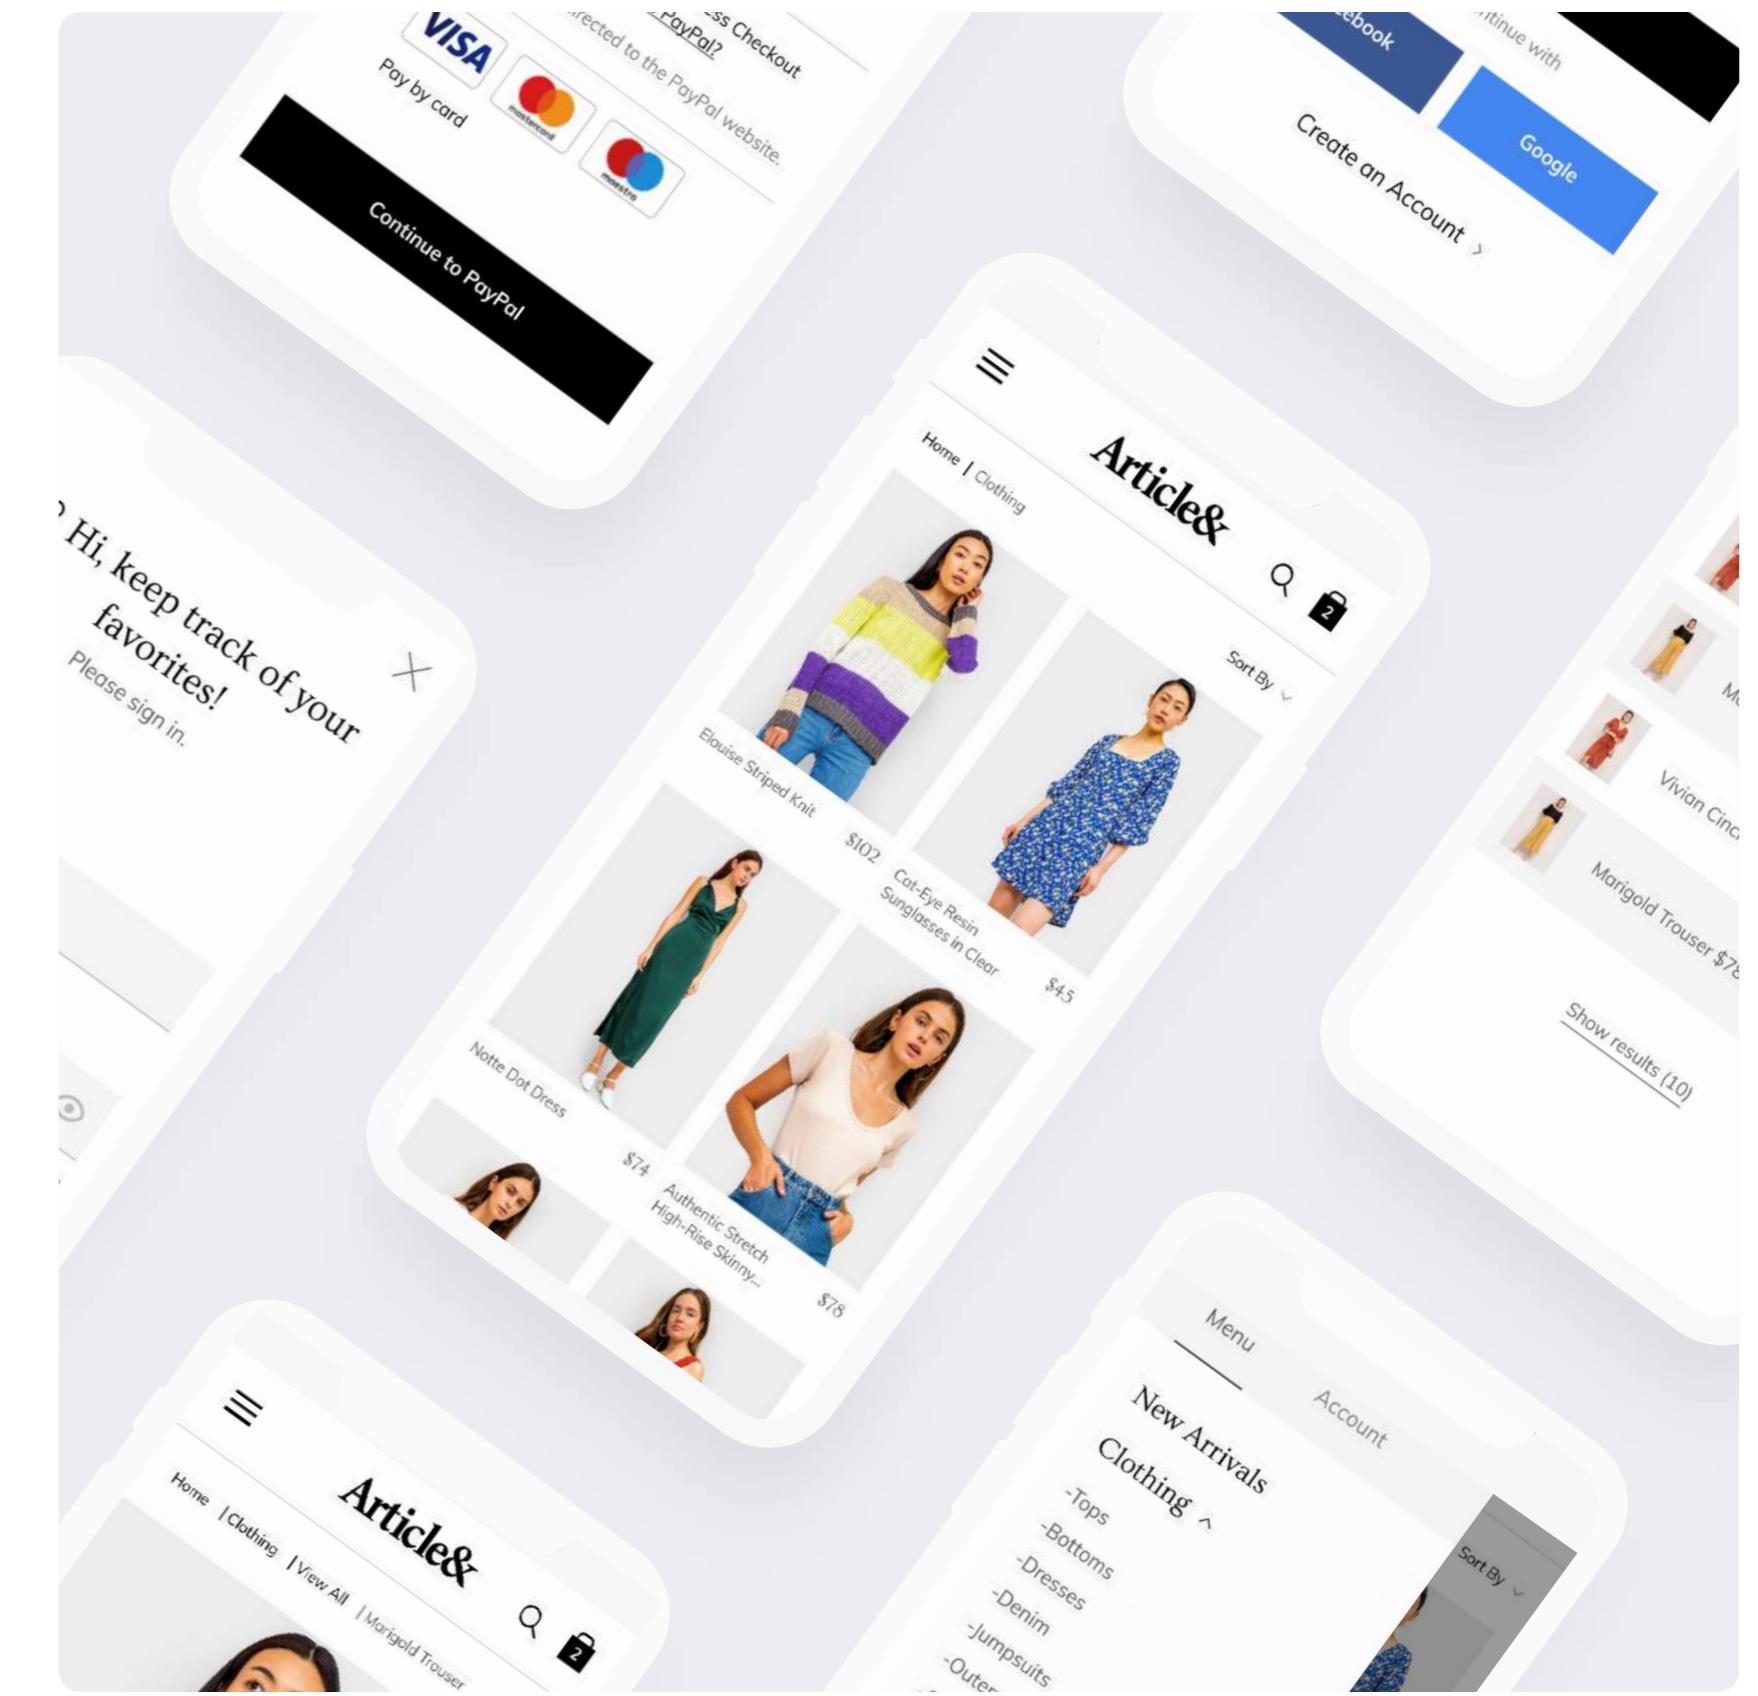

### Improved experience

- Checkout Process;
- Catalog;
- Product;
- Shopping Bag;

# Elevating the First Impression

Revamping Articleand.com's Mobile Homepage with Improved Fonts, Images, and Icons for an Engaging User Experience

I appreciate your time and attention. I would  
be happy to hear from you.
